Vāstu and Thermal Comfort: Measuring Traditional Orientation Rules

Sample Author**ABSTRACT**

Field measurements from twelve traditional houses across three climate zones, tested against the orientation principles set out in Vāstu texts, with attention to which effects are attributable to orientation and which to material and form.

Introduction

Field measurements from twelve traditional houses across three climate zones, tested against the orientation principles set out in Vāstu texts, with attention to which effects are attributable to orientation and which to material and form.

This is sample content prepared to demonstrate the journal platform. The published version would continue with the full argument, its evidence and its apparatus.

Method

Sources are cited by edition, chapter and verse where a primary text carries the argument. Where a translation is the author's own, it is marked as such.

Discussion

Claims about a tradition are distinguished from the author's inference, and modern scientific or social claims are supported by contemporary evidence rather than asserted.
